

## Quick selection chart – freezing condensing units

Condensing units for freezing stores applications selection chart. Cooling units capacity are given for  $T_{amb} = +27^{\circ}\text{C}$  and evaporating temperature  $T_e = -30^{\circ}\text{C}$ .

### Freeze Stores - units capacity overview 1 - 34 kW (R404A, $T_{amb} = +27^{\circ}\text{C}$ )

## Cold Stores - units capacity overview 1 - 84 kW ( R404A, T<sub>amb</sub>=+27°C)
